DETAILED ACTION

Allowable Subject Matter

Claim's 1, 4-10, 12 and 14-20 are allowed.

The following is an examiner's statement of reasons for allowance: Linzer et al. teach much of the claimed information, but fail to specifically teach where the table is an orthogonal table generated using the statistical model $x = \mu + A + B + C + D + Ax_B + Ax_C + Bx_C + \varepsilon$ where ε is an error factor, and μ is an average of A, B, C, D, AB, AC and BC, the orthogonal table having columns A, B, C and D. Linzer et al. also fails to specifically teach where the level-values comprise, for each column in the predetermined table, a first level-value being a sum of the match-value of the search locations having a first value in that column, a second level-value being a sum of the match-value of the search locations having a second value in that column, and a third level-value being the absolute difference between the first level-value and the second level-value.

A further search a conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
